1. I performed well on all areas of the exam, but I was particularly strong with the iso-ortho drawings and the Solidworks model. I received full marks on both these sections, and I lost 4 points on the Carmen portion since I wasn't comfortable with lines on section views. This reflects my coursework because I completed all the assignments and scored well on them. I also looked at assignment feedback if I missed points so I wouldn't make the same mistake again.
